

Interruptions...

What is their true cost?

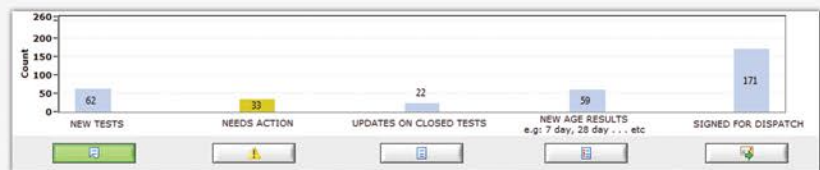

Real time + money

Did you know people take about 23 minutes to resume their tasks after an interruption? For an Engineer, lost focus from billable work means lost time and money.

Focus on your tasks

BreakTest improves workflow for your entire materials testing team, hence reducing interruptions, and empowering you to monitor and prioritize your tasks.

Test reports are automatically routed for data entry, signing and dispatch.

BreakTest

Software for Soils & Concrete Testing
